Professional Summary

Informatics Engineering graduate (3.89 GPA) with hands-on experience in Fullstack Web Development, specializing in PHP (Laravel), custom WordPress plugin engineering, and API integration. Strong background in building end-to-end web applications, handling web security cleanup, and setting up automated data workflows using Google Apps Script. Proven ability to collaborate in team environments and write clean, maintainable code.

Technical Skills

Languages & DB: PHP (Laravel), Golang (Gin), SQL (PostgreSQL, MySQL), JavaScript (ES6+), TypeScript, HTML5/CSS3
Web Technologies: Next.js, React.js, Tailwind CSS, WordPress (Custom Plugins & Elementor HTML Customization)
Tools & Infrastructure: Docker, Git, Cloudflare Security, Google Apps Script, Finnet/Finpay API, Fazzpass OTP API

Experience

Web Developer (Maganghub Kemnaker) Nov. 2025 – May 2026
OK OCE Indonesia *Jakarta, Indonesia*

- Co-developed a multi-tenant Event Management Dashboard with Trisakti University, allowing community drivers (Penggerak) to host events independently under OK OCE superadmin control.
- Wrote the OK OCE Finpay Plugin to connect Elementor forms with Finpay API, automating paid event transactions and eliminating manual verification.
- Built the OK OCE Tracker Plugin and set up a Google Apps Script pipeline to sync event data (Pre/Post-test, Satisfaction Index, M&E) into Google Sheets and the public laporan-dampak dashboard.
- Integrated WhatsApp OTP verification via Fazzpass API on registration forms to secure user endpoints and eliminate fake accounts.
- Redesigned the okoce.net homepage using optimized Elementor components and prepared technical documentations to secure the official PSE Kominfo certification.
- Resolved a critical security incident by removing malware and gambling script injections from the Executive Chairman's websites, securing the domains behind Cloudflare to mitigate future breaches.

Full Stack Developer (Internship) Apr. 2024 – Oct. 2024
TransTRACK *Jakarta, Indonesia*

- Built a social media management dashboard using Laravel and Tailwind UI to fetch and display analytics data from official Instagram, Facebook, and LinkedIn APIs.
- Set up the development environment using Docker and handled database migrations, utilizing asynchronous Queue Workers to handle background data syncing reliably.

Key Projects

Okoce.net Core Redesign | *WordPress, Elementor HTML, Tailwind CSS, JavaScript* Nov. 2025 – May 2026

- Overhauled core platform interfaces by injecting custom Tailwind CSS and JavaScript into Elementor blocks, fixing responsiveness and accelerating page loading speed.
- Created a data routing flow using Google Apps Script to capture frontend interactions and securely stream them into analytical spreadsheets.

Reinsan Capital Official Platform | *React.js, Tailwind CSS, Elementor UI Patterns, SEO* Dec. 2025 – Feb. 2026

- Developed a high-performance React.js corporate landing page based on Elementor HTML layouts, utilizing Tailwind CSS to achieve a clean, mobile-first interface and proper SEO structure.

Education

Dian Nusantara University Jakarta, Indonesia
Bachelor of Informatics Engineering (GPA: 3.89 / 4.00) *Graduated 2025*

Certifications

Junior Web Developer (BNSP): Certified by the Indonesian Professional Certification Authority in UI Implementation, API integration, and Database Best Practices (Valid until 2028).
